

WILLIAM E. KIRWAN

CENTER *for* ACADEMIC INNOVATION

---

**Leading Academic Change: An Early Market Scan of Leading-edge  
Postsecondary Academic Innovation Centers**

MJ Bishop

Director, Kirwan Center for Academic Innovation  
University System of Maryland

Anne Keehn

President and CEO, Quantum Thinking  
(formerly Senior Fellow for Technology and  
Innovation, Post-secondary Success Team, BMGF)

## Background

*Academic change* is the term being used increasingly to describe universities' efforts to improve student success by creating optimally effective learning environments that simultaneously increase access, affordability, and quality of higher education for all those who want a postsecondary degree.

Institutions are starting to see the vast potential of hybrid classrooms, shared courseware initiatives, open educational resources, competency-based education, learning analytics, and adaptive learning environments and they are seeking ways to scale and sustain these innovations.

Among the positive outcomes from these change efforts have been two interesting developments. First, there appears to be an increasing number of institutions that are reconstituting their "faculty development centers" and/or "centers for teaching and learning" to help lead their organizations in transforming and advancing student success through academic innovation and improved support for students and faculty. The second recent development has been what appears to be a sharp increase in the number of senior administrative positions in academic affairs being created over the last 2-3 years to lead their institution's academic change initiatives. These individuals hold titles such as *Assistant Provost Office of Academic Innovation*, *Vice Provost for Innovation in Learning and Student Success*, or *Associate Provost for Learning Initiatives* and are often filled by faculty leaders who have emerged as "change agents" among their colleagues. In some cases, they are managing a complex combination of instructional design and technology staff, faculty development centers, and data analytics units. And, while these individuals may be experts in innovative pedagogies supported by emerging technologies, many seem to be less well versed in the integration of these technologies or the organizational change theories and change management approaches that will be necessary to make innovations scalable and sustainable within their institutions. Individuals filling these newly constituted positions are seeking support networks and professional development opportunities.

It seems we may be observing the emergence of a new, interdisciplinary "innovation infrastructure" within higher education administration. However, little is known beyond anecdotal information about how these changes are being implemented.

## Purpose

The purpose of the Leading Academic Change project was, therefore, to begin exploring this trend using a 3-pronged approach:

- bring together a cross-section of academic innovation leaders to begin the conversation around academic change leadership during a 2-day **Leading Academic Change Summit**;
- conduct **Interviews with Innovative Teaching and Learning Centers** to learn more about how their centers are functioning and where changes are occurring; and
- based on our findings from the Summit and our interviews, design a **National Survey of Campus Centers for Teaching and Learning** to explore the larger landscape.

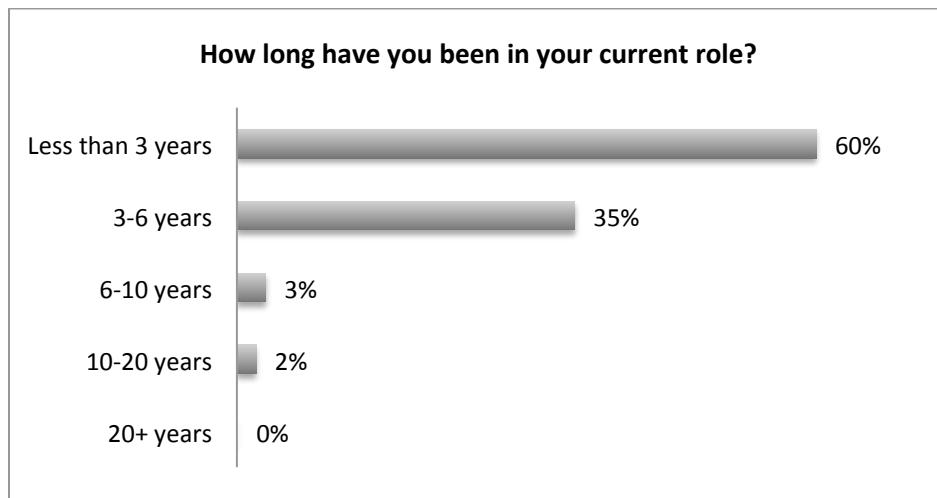

## Leading Academic Change Summit

With support from the Bill and Melinda Gates Foundation, the University System of Maryland's Center for Academic Innovation hosted the inaugural *Leading Academic Change Summit* on December 2<sup>nd</sup> and

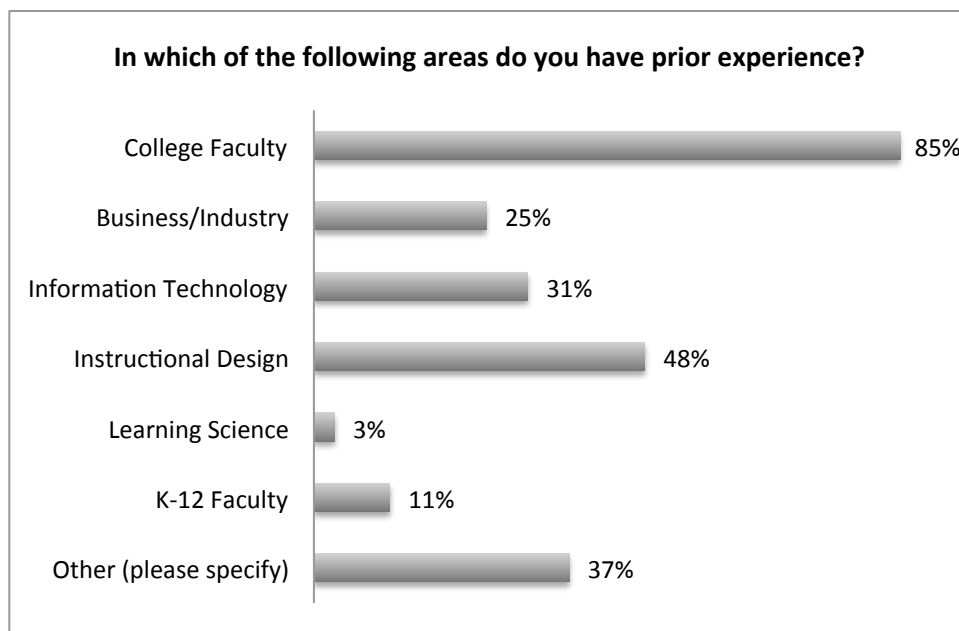

3<sup>rd</sup>, 2014. The Summit brought together more than 60 academic innovation leaders, representing 2- and 4-year public and private colleges, universities, and systems as well as other guests from ACE, APLU, EDUCAUSE, Ithaka S+R, NASH, and NASPA. Invitees were selected based on the knowledge and experience of the project directors in consultation with other experts both at the USM Center for Academic Innovation and the Bill and Melinda Gates Foundation.

The highly interactive 2-day conference was a rare and exciting opportunity for this diverse group of higher education leaders to engage in discussions around how academic transformation efforts are unfolding on their campuses, explore common challenges, and identify promising practices. Among the learnings from the Summit discussions and the pre-/post-conference surveys were:

Almost all of the participants (94%) have been in their position 6 years or less and more than half (59%) for 3 years or less.

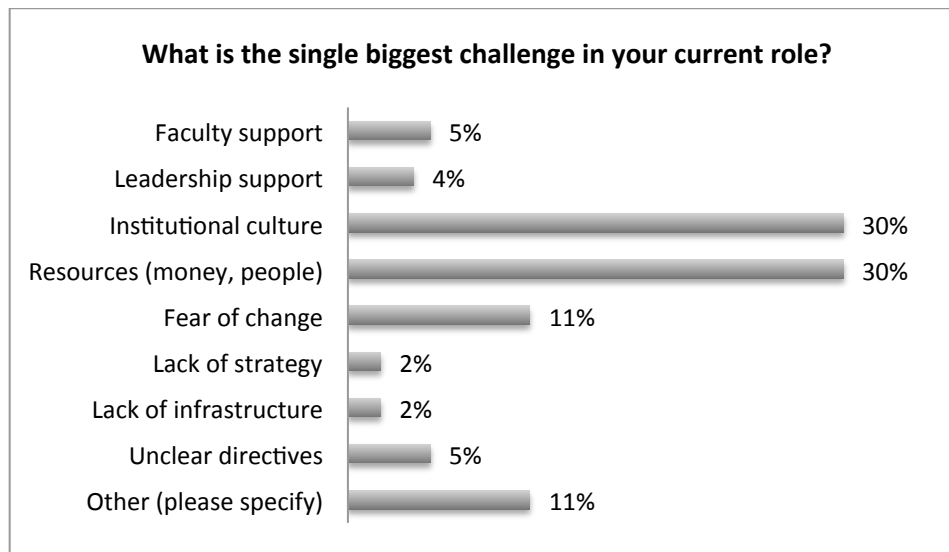

Most (85%) have college/university faculty experience.

More than three quarters (78%) report to the Provost/Academic Affairs VP (as compared with IT/CIO, chancellor/president, or student affairs).

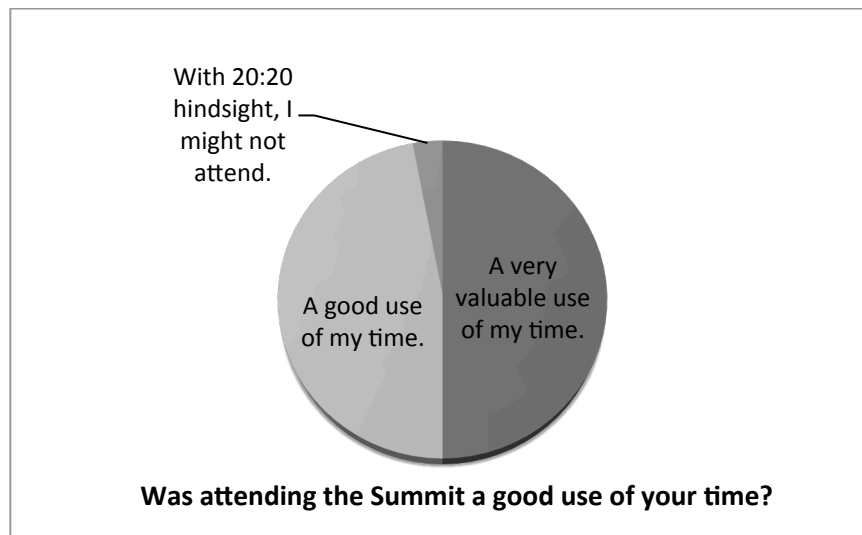

Navigating “institutional culture” is among the biggest challenges these leaders’ encounter (equal to “lack of resources”).

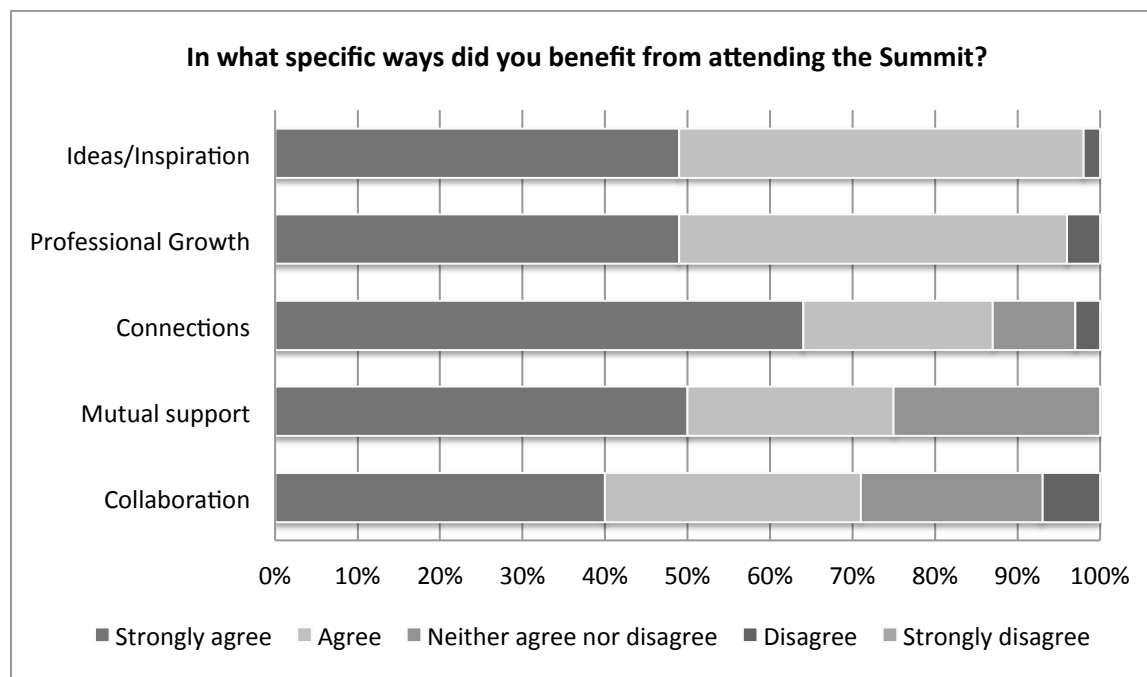

They are eager to learn more about theories and strategies for faculty engagement, boundary spanning, and organizational/cultural change. The top 3 reasons for attending the Summit (all 97% agreed or strongly agreed) were:

- Seeking ideas or inspiration to help them in their job.
- Advancing their thinking about leading academic change at their institution.
- Making/strengthening bonds with people who will help them do their jobs.

Ninety-seven percent of participants reported they thought the Summit was a good use of their time, and 50% of those stated that it was, in fact, a “much more valuable use of my time than what I probably would have done otherwise.”

When asked about the specific ways they felt they benefited from the Summit, participants' top responses included making connections and mutual support.

Much of the conversation at the Summit seemed to confirm that these academic change leaders are eager to have interactions with colleagues for networking, inspiration, and collaboration, but existing networks and membership organizations are not sufficiently addressing their needs. Participants also confirmed the need for a new network in their survey responses, with nearly 77% confirming that there would be value in developing this new network.

Overall, Summit participants left energized and with a new sense of focus. Additionally, there continues to be interaction and communication among the attendees including the formation of at least one northeast regional group that is exploring collaborations around faculty teaching and learning innovation grants.

Also as part of the project, in October 2014 we engaged the services of Cynthia Jennings of The Black Bear Group to conduct in-depth interviews with a total of 17 particularly innovative academic transformation leaders to talk about the evolution of the teaching and learning centers at their institutions. The interview protocol and the list of targeted institutions were derived by the project directors in consultation with Ms. Jennings and experts at the USM's Center for Academic Innovation and the Gates Foundation. Interviewees included representatives from a variety of institution types, including public and private, 2-year and 4-year, research intensive and liberal arts, as well as one public higher education state system. Interviews were conducted between November 2014 and early January 2015.

### **Key Findings**

#### *Revisioning and Reorganizing:*

What used to be “centers for teaching and learning” are taking on much broader responsibilities and roles across campus, necessitating revisioning and reorganization. While the models institutions pursue still vary quite a bit, some themes do seem to be emerging from these particularly innovative efforts.

For example, Stanford, the University of Maryland, and Purdue University have all recently completely reorganized and moved several functions –including their teaching and learning center– under a new Vice Provost for Teaching and Learning or similarly named position. Similarly, UT-Austin recently merged the university's Continuing and Innovative Education unit into the Center for Teaching and Learning, creating a new kind of campus infrastructure for teaching and learning that includes both on-campus and off-campus academic innovations. At the University of Georgia, these mergers are breaking down political and budgetary boundaries that have existed in the past and prevented the kinds of collaborations needed to truly impact teaching and learning.

Another traditional boundary that appears to be getting increasingly fuzzy is that between academic and student affairs. Many “pedagogy centers” are also beginning to look at topics like student health and well-being and other student success areas. In some cases, like LaGuardia Community College, we are seeing the total merger of academic affairs and student affairs under the Provost.

But as new organizational structures are emerging, sometimes boundaries can be difficult to establish and/or maintain. In some cases, boundaries are blurred because institutions have retained their “legacy” structures. For example, the University of Connecticut has retained their Institute for Teaching and Learning while also having recently started a Center for Excellence in Teaching and Learning. The former is serving largely as their instructional technology unit now. Similarly, Georgetown has both a Center for New Designs and Learning and Scholarship (CNDLS), which focuses on teaching and learning, and the recently created “Red House,” which serves as an innovation incubator with a student success focus. These units along with the Center for Technology Innovation, the Center for Teaching Excellence, and the Center for Assessment Analytics and for Research are working in close collaboration to assure that they are all part of the conversation.

#### *Collaboratives:*

In fact, regardless of the organizational changes, most these efforts involve strong collaborations among various units on campus, including the library, instructional technology, facilities, and the like. Purdue's

center, for example, works very collaboratively, assigning “teams” to work with faculty on course transformation under their IMPACT program. American University also draws heavily upon collaborations with student affairs in programming on diversity and inclusion and their open educational resource initiatives.

Because most academic change units are in the tricky position of not being able to dictate change from the top down, several of these centers are exploring a “shared services model.” UT-Austin’s center, for example, works hard to “empower and facilitate structure” rather than impose strategies. In their center redesign, UT-Austin has made substantial changes aimed at giving resources directly to the leading faculty innovators on campus, essentially “deputizing” these leaders through the Provost’s Teaching Fellows program.

#### *Student Involvement:*

As the focus shifts from faculty success to thinking more about student success, many of these centers are involving students more directly in the work. For example, LaGuardia Community College actually employs students to help train the faculty. Stanford also works very closely with students. In fact, under the Stanford center’s umbrella are also student learning resources, the tutoring programs, the academic skills and coaching programs, the student resilience programs, and graduate teaching development.

#### *Technology’s Role:*

Technology is often not the leading focus of most of these efforts, but rather viewed as a tool to potentially help achieve desired outcomes. UT-Austin, for example, has created an Associate Vice Provost for Learning Sciences position that oversees a Learning Sciences group that includes faculty developers, digital content developers, technologists, and a unified learning analytics infrastructure. Duke’s center, which is the only one among the 17 that reports up through the library, works very hard to take faculty who come in wanting to test a new technology and get them thinking, instead, about transforming their course. This is also true for Carnegie Mellon’s Eberly Center, which grounds any technical solutions in the desired learning outcomes.

## **National Survey of Campus Centers for Teaching and Learning**

In November 2014 we engaged the services of Kenneth C. Green of The Campus Computing Project to work with us on the distribution and statistical analysis of the *first known* national survey of campus teaching and learning centers. Survey items were designed and developed from our preliminary findings from the Summit and the interviews. We also sought the help of a variety of higher education experts from POD, the USM Center for Academic Innovation, and other experts at the Gates Foundation including Anne Keehn (grantor), Senior Fellow for Technology and Innovation and part of the Postsecondary Success Team, as well as Rahim Rajan and Greg Ratliff, both Senior Program Officers, Postsecondary Success, and Jason Palmer, Deputy Director, Postsecondary Success. See Appendix 7 for the entire survey with data tables.

Given that there is no definitive “list” of U.S. higher education teaching and learning centers and/or their directors, we decided to employ an “open survey” approach. We invited those center directors we did know to respond while, at the same time, circulating the survey to the memberships of various technology-and-pedagogy-oriented higher education professional organizations with a request to

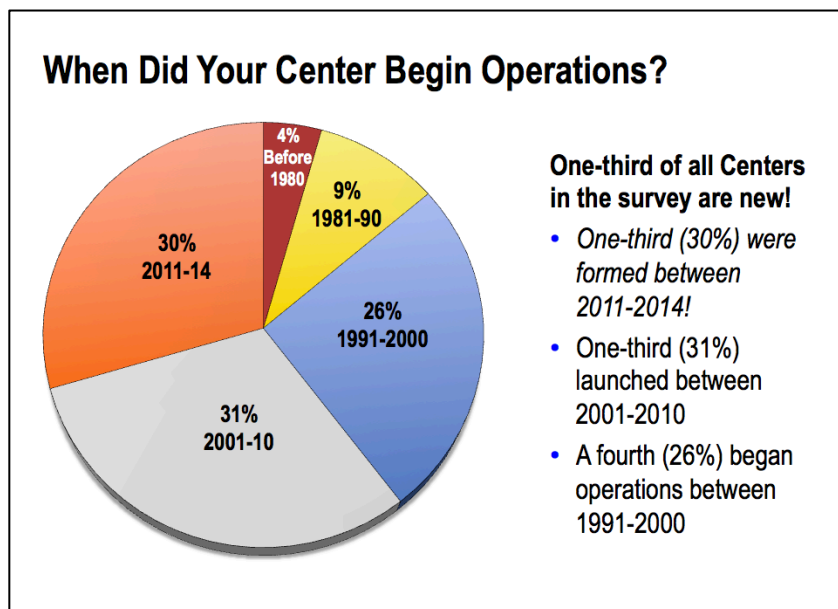

participate or to pass on the link to an appropriate respondent. These open requests for participation went to various listservs at EDUCAUSE (the CIO, ELI, Blending Learning, Small Colleges, and Community Colleges lists), the Online Learning Consortium (OLC), the Council on Libraries and Information Resources (CLIR), and other professional organizations. We also received support from POD, NISOD, and the TLT Group to promote the survey with their members.

The survey was distributed in January 2015. In total, 163 center heads/directors responded, fairly evenly distributed among public/private, 4- and 2-year, research and comprehensive. While we were pleased with the participation level and the diversity of institutions represented given the difficulty in locating the centers and their directors, there are over 4000 colleges and universities in the U.S. and many more than 163 are likely to have teaching and learning centers. The findings reported below should, therefore, be considered to be illustrative, but not definitive.

### Key Findings

#### *Center Launch:*

Many of these centers are new. One-third (30%) were formed between 2011-2014 with a second third (31%) having launched between 2001-2010.

#### *Director Background and Status:*

Three-fifths (58%) of the center directors who responded have experience as teaching faculty and two-thirds (64%) are holding some type of academic appointment while also serving as center director.

#### *Center Leadership:*

Most center directors have academic backgrounds and many also still retain faculty status (full-time or part-time). Three-fifths (58%) of the respondents have backgrounds as teaching faculty and two thirds (64%) have some type of academic appointment.

#### *Center Reporting Function:*

Most centers (81%) report up through the Provost or Academic Affairs Office. The remainder report to the CIO (6%), the library (2%) or “other” units such as a special learning or innovation office (10%).

*Changing Mission and Reporting Functions:*

Most of the centers have recently experienced a change in mission, with almost 60% of the center director respondents reporting either that their center’s mission has changed in the past 2 years or is likely to change within the next 2 years. Similarly, more than one-third of the responding centers have either recently undergone a reporting function change or anticipate one within the next two years.

*Number of Centers on Campus:*

Nearly half of all respondents reported their campuses have two or more similar centers supporting the institution’s instructional mission.

*Budgets and Staff:*

While the majority of respondents indicated their budget has experienced little or no change over the last 2 years, the good news is that only one-fifth have experienced budget cuts and a third benefited from budget increases. However, there are big variations within sectors, with public institutions’ centers generally seeing less modest budget growth than their private counterparts. Perhaps not surprisingly, larger universities have larger compliments of center staff than smaller institutions (approximately 10 as compared to 3-5) and also make greater use of student workers.

## Center Budgets

A/Y 2014-15	ALL	Public Univ	Public MA	Public 2- Year	Private Univ	Private MA	Private BA
Mean	\$522,507	1,116,854	355,708	267,605	1,097,148	129,194	71,086
Median	\$137,000	650,000	100,00	65,000	700,00	65,000	35,000
<b>Budget Increase or Decrease Over the Past Two Years</b>							
+ 8% or more	15	8	7	9	30	29	15
+ 3-7%	17	27	17	13	5	9	15
+/- 2%	51	51	52	48	55	48	60
- 3-7%	9	3	14	17	5	11	5
- 8% or more	9	11	10	13	5	7	5

### Center Budgets

- Big variations within sectors
- Budget may not include personnel costs

### Budget Trends

- Majority report little or no change
- Variations by sector regarding gains
- A third benefited from budget increases
- A fifth experienced budget cuts

## Professional Personnel and Staff

Average Headcount	ALL	Public Univ	Public MA	Public 2- Year	Private Univ	Private MA	Private BA
Professional Staff	6.4	10.6	4.1	3.5	9.4	7.2	2.2
Faculty Fellows	2.4	4.2	1.8	2.6	3.7	1.2	0.8
Admin Support Staff	2.3	2.3	1.2	1.7	3.2	4.6	0.8
Students Assisting Prof Staff	5.5	9.4	3.3	0.2	12.3	2.0	7.1
Students Assisting Adm. Staff	1.2	3	0.8	0.5	2.8	1.1	0.7

### Center Staffing Affected by Campus Size and Mission

- Universities have larger staff than other sectors, and also make greater use of student workers

### Center Priorities:

Center directors who responded indicated that their primary foci are on faculty engagement with students, course design/redesign (online/hybrid and face-to-face), and leveraging instructional/learning platforms for instruction. Other technologies and approaches such as adaptive, analytics, open educational resources, courseware, e-portfolios, competency-based learning, and badging were all rated as far lower priorities. This finding may also be reflected in the responding center directors' surprisingly low awareness or familiarity with third-party digital content providers.

## Current Priority of the Center's Activities and Initiatives

Scale: 1=low priority 7=high priority percentages	Low Priority (1-2)	Medium Priority (3-4-5)	High Priority (6-7)
Faculty engagement with students (high impact practices)	3	17	81
Course / program development or redesign for on-campus courses	9	34	57
Course / program development or redesign for blended / hybrid courses	12	37	51
Leveraging Cloud platforms for instruction (LMS, learning platforms)	24	30	46
Course / program development or redesign for fully online courses	25	34	42
Classroom / learning spaces design	25	41	34
Adaptive learning technologies	38	43	19
Learner / learning analytics	30	53	17
Improving academic advising	46	37	17
Use of ePortfolios	37	48	15
Competency-based learning	50	38	13
Assessment of prior learning	33	54	13
Open Educational Resources (OER)	40	48	12
Use of third-party digital courseware	44	44	11
Digital textbooks and course materials	41	50	9
Gaming and simulations	53	44	4
Digital Badging	67	30	3

### High Priority

- Faculty engagement with Students
- Course design for on-campus, hybrid courses & online courses
- Leveraging cloud platforms

### Low Priority

- Adaptive technologies, advising, learning analytics
- OER, Digital curricular resources, Competency-based learning, Badging

### Usage:

According to the center directors, pre-tenured, full-time faculty are the primary users of these centers. While lower numbers of engagement for tenured and part-time faculty may not be particularly surprising, it is disappointing to see that respondents reported very little use by graduate and undergraduate students. When asked what disciplines tend to make more use of the center, respondents indicated the highest levels of engagement come from the social sciences, STEM fields, and health sciences. The least engaged disciplines are business and education. Also, according to the responses, it seems the primary uses that faculty are making of the center resources and services are professional development for teaching and instructional design help.

## Best Estimate of Who Uses the Center's Resources

percentages	ALL Institutions	Not App.
Full-time Faculty	38	3
Part-time Faculty	24	13
Academic Staff	15	33
Graduate Students	20	52
Undergrads	18	63

### Full-time Faculty Are the Primary Users

- Highest numbers for full-time faculty
- Low numbers for part-time faculty not surprising
- Surprisingly low numbers for graduate students
- Little undergraduate activity (function of mission and marketing?).

### Effectiveness and Impact:

Given faculty usage it is, perhaps, not surprising that the directors rate “improving teaching skills” and providing course redesign support as the most effective services their centers offer. When asked about their center’s impact, the directors indicated they thought they were having a modest positive impact on learning transformation and student success. When asked about the one thing their center could do better, the responses included engagement beyond full-time pretenure faculty, communication about services, and use of assessment (both to assess faculty progress and to assess the Center’s work).

## Perspectives on the Center's Impact

percentage who agree/strongly agree

The Center serves as an effective catalyst for a significant learning transformation in teaching and learning	71
The Center serves as a positive catalyst for modest improvements in teaching and learning.	92
The Center touches a large group of faculty and serves them well	61
The Center touches only a small group of faculty but serves them well	54
The Center serves as an effective catalyst for a significant transformation in overall student success.	45
The Center serves as a positive catalyst for a modest improvement in overall student success.	70
The Center's activities and services are well known and widely respected on campus	81

### Good but not great impact on

- Learning transformation
- Student success

### Outreach Strategies:

Directors are using a variety of strategies to encourage use of center resources –everything from financial and course release incentives to changes in promotion and tenure policies. Among those strategies rated most effective were departmental outreach and financial incentives. Least effective were efforts to promote learning science research (evidence), funding to present at pedagogy conferences, and providing professional accreditation support to the program.

<b>Outreach Strategies to Encourage Faculty to Use the Center's Resources and Services</b>			
Scale: 1=not effective 7=very effective percentages	Not Effective (1-2)	Medium Effective (3-4-5)	Very Effective (6-7)
Outreach to division and department chairs	11	56	33
Financial incentives to individual faculty	8	62	31
Support to present at teaching / pedagogical conferences	16	65	20
Support with accreditation requirements of professional programs	13	70	17
Course release time for faculty during the academic year	10	78	13
Use of learning science research to improve student learning	19	68	13
Changes to promotion and tenure policies that encourage teaching innovation	10	80	10
Financial incentives to academic programs / departments	8	86	7
Embedding support staff in academic units	10	83	7
Course release time for faculty during the summer months	10	84	6

**Very Effective**

- Outreach to dept. chairs
- Financial incentives

**Not Effective**

- Promoting learning science
- Conference support
- Accreditation requirements

This was the first known attempt to do a broad survey of teaching and learning center directors and we received a good deal of positive feedback from respondents for making this effort to reach out to them and learn more about their experiences. Overall, the survey results demonstrate the clear need to engage faculty in the work of academic innovation and illustrate some of the difficulties involved in doing so. The findings suggest the importance of supporting these teaching and learning center directors' efforts through stronger engagement with academic department as well as better messaging from the Provost around the importance of these centers as a key strategy to promote innovation. Additionally, training for center directors in how to manage change and affect organizational culture was among the top responses participants volunteered when asked "what key issues did we miss in the survey?"

### Summary and Conclusion

There was a surprising amount of consistency in the data that we collected across this three-pronged project, all of which does seem to point to the emergence of a new, interdisciplinary innovation infrastructure within higher education administration. Overwhelmingly, this transformation is most apparent within Academic Affairs units, which may mark a shift in thinking about the role academic affairs can and should play in institutional efforts to increase effectiveness and affordability, particularly in relation to student success. And, increasingly, these efforts are taking on a highly collaborative tone, busting traditional higher education silos in order to progress and, in some cases, even bringing multiple units together under one "umbrella" position.

Centers for teaching and learning are clearly evolving at the same time, often providing the underlying structure necessary to support academic change more broadly. These centers' missions are shifting from a reactive "faculty development" focus to a more proactive "teaching and learning transformation" focus. Student success, not just faculty success, is now a priority for most. And, as part of this mission shift, these centers' responsibilities are expanding to include program and curricular redesign, "next generation digital learning," assessment and analytics, facilities and use of instructional space, as well as advising and other student success initiatives.

Given their background and expertise, the individuals charged with leading academic change appear to be respected if, perhaps, somewhat isolated advocates. Their biggest challenge is changing the institutional culture, but they may not be particularly well trained for the task or well supported in that role. In addition to lacking the evidence they need to demonstrate benefits to faculty for innovations, they face the continuing challenge of building strong alliances with academic departments.

This is a time of transformational and, perhaps, disruptive change in higher education. Public and private colleges and universities increasingly face calls for more transparent accountability, evidence of return on investment, and creative solutions to difficult problems including budget constraints, rising costs, and stagnant completion rates. Additionally, the changing character of our students in terms of their preparation, prior experiences, motivation, culture, age, and expectations of our institutions challenges us to seek new pedagogical models that capitalize on recent findings from the learning sciences as well as the capabilities of emerging technologies. As a result of these pressures, our higher education institutions are responding by creating a new, interdisciplinary "innovation infrastructure."

This project has taken the first steps to shed some light on how these organizational changes are being implemented and who these new academic innovation leaders are. But clearly there is more work to be done to support these leaders' efforts to affect change within their institutions.

## **Appendix 02: Evolution of T&L Centers -- Interview Protocol**

### **Our hypotheses:**

There is an increasing number of institutions that are reconstituting their Faculty Development Centers and/or Centers for Teaching & Learning to help lead their organizations in transforming and advancing student success through improved teaching and learning.

The changes appear to include the following:

1. Infrastructure reorganization that takes these centers out of library and/or IT focused units of the institution and moves them into academic affairs and under the supervision of the Provost.
2. Efforts to move long-time, well-respected faculty into administrative/ leadership roles within these Centers and/or within the Provost's office to oversee these Centers (along with other direct reports such as instructional technology and learner analytics).
3. Tighter alignment and collaboration with what used to be called "student success" programs and initiatives in Student Affairs.
4. A new leadership role has been created and reports to the Provost and/or President

### **Questions:**

1. What is the name of your Center/Institute? Your official title? Who do you report to?
2. Where is your Center/Institute housed within the overall organizational structure? In academic affairs? Information technology?
3. When was your Center/Institute created?
4. What is the background of your Center's director? Academic/Faculty? Staff? (If not talking to Center director, get name and title).
5. How would you gauge the level of faculty participation in the programs/services offered by the Center?
  - a. What sorts of strategies do you use to encourage different faculty to engage with the Center's programs/services so that you're not always just "preaching to the choir?"
  - b. What do you perceive are the barriers or levers for increasing faculty use of the Center/Institute?
6. To what extent does your Center collaborate with the other units on campus that are critical to its mission? (So, for example, if Center is housed in IT to what extent does it collaborate with academic affairs and vice versa?)
7. If you had to pick one thing (program, approach, strategy) that stands out for you as being particularly innovative about your Center/Institute, what would it be?
8. In what ways, if any, has the mission/focus of the Center's efforts changed over the last few years?
9. On a scale of 1-5 (with 1 being "not at all a priority" and 5 being "top priority"), what are the sorts of initiatives that your Center/Institute is focusing on right now:

- a. Course/program redesign
  - b. Competency-based learning
  - c. Learner/learning analytics
  - d. Open Educational Resources
  - e. Adaptive learning
  - f. Faculty engagement with students (high-impact practices)
  - g. Badging
  - h. Prior learning assessment
  - i. Use of e-portfolios
  - j. Other?
10. To what extent have you seen other institutions shift the focus/mission of their faculty development/T&L centers and how?
11. Has your budget increased over the years? Staff size increased/decreased?
12. Are there Centers that you consider exemplars? Who have changed their model (s) of support for Faculty and Students in teaching & learning?
13. What conferences do you attend for knowledge and professional development in your Center leadership role?
14. If there were to be a National Summit and/or a network of your peers, would you find this valuable to attend/join? If so, why?
15. Is there someone else you think we should be talking with to get the answers to these questions?

### **Appendix 03: Evolution of T&L Centers Interview Participating Centers**

- 1) American University, Center for Teaching, Research, and Learning
- 2) Carnegie Mellon University, Eberly Center for Teaching Excellence
- 3) Dartmouth College, Center for the Advancement of Learning
- 4) Duke University, Center for Instructional Technology
- 5) Franklin and Marshall College, The F&M Faculty Center
- 6) Georgetown University, Center for New Designs in Learning and Scholarship
- 7) LaGuardia Community College, LaGuardia Center for Teaching and Learning
- 8) Purdue University, Center for Instructional Excellence
- 9) Stanford University, Center for Teaching and Learning / Teaching Commons
- 10) Towson University, Office of Academic Innovation
- 11) Vanderbilt University, Vanderbilt Institute for Digital Learning

## **Appendix 04: Survey Data Tables**

See next page.

# The 2015 National Survey of Campus Centers for Teaching and Learning

Sponsored by Center for Academic Innovation, University System of Maryland with financial support from the Bill and Melinda Gates Foundation

<i>unless otherwise indicated, all data are for percentages (%)</i>	ALL INSTITUTIONS	Public University	Public MA	Public Two-Year	Private University	Private MA	Private BA	For-Profit
<b>Number of respondents</b>	171*	39	30	26	20	30	20	5
<b>Q1: What is the name of your college or university? (open ended response)</b>								
<b>Q2: My Institution has a Campus Center for Teaching and Learning, Professional Development, or Academic Transformation that supports faculty and students in using educational technologies and innovative practices for teaching and learning. (percentages)</b>								
Yes	99	100	100	96	100	100	100	80
No	1	0	0	4	0	0	0	20
Don't know								
<b>Q3: Are you the head or director (senior officer) of the Center? (percentages)</b>								
No	4	3	0	12	0	3	0	40
Yes	96	97	100	88	100	97	100	60
<b>The data presented below are for only the head or director of a campus Center.</b>								
<b>Q4: Reporting structure for the institution's Center: To what office does the Center report?</b>								
Academic Affairs / Provost	81	76	66	87	90	86	90	67
Information Technology / CIO	6	11	10	0	5	7	0	0
Library	2	0	3	4	5	0	0	33
Student Affairs	0	0	0	0	0	0	0	0
Other	10	13	21	9	0	7	10	0
<b>Q5: When did the Center begin operations (year)?</b>								
1961 - 1980	4	13	3	0	0	0	5	0
1981 - 1990	9	16	7	25	11	0	0	0
1991 - 2000	26	32	34	15	42	14	15	0
2001 - 2010	31	24	34	30	32	41	25	33
2011 - present	30	16	21	30	16	45	55	67
<b>Q6: Is your Center the only such unit on the campus or others that offer similar instructional support and professional development services?</b>								
This Center is the only such unit on campus	45	26	48	70	40	45	50	100
This Center is the primary unit for these resources and services, but there are others, often linked to academic programs or other campus units.	48	66	45	26	55	48	45	0
This Center is one of several similar units on campus, but none is the primary campus center for these services.	6	8	7	4	5	7	5	0
Don't know	1	0	0	0	0	0	0	0
<b>Q7: As the Center head or director, do you also have another institutional appointment?</b>								
No: No other institutional title	21	26	31	22	25	21	0	0
Yes: I have a regular (tenure-track) faculty appointment	43	39	41	30	40	45	70	0
Yes: I have an appointment as adjunct or affiliate faculty	21	29	14	22	25	21	10	33
Yes: I have another staff / administrative appointment in addition to the position of Center director	15	5	14	26	10	14	20	67
<b>Q8: As the Center head or director, which description below characterizes your background?</b>								
Teaching faculty	58	39	62	52	55	66	90	33
Research faculty	7	8	3	0	20	7	5	0
Staff / administration	28	37	28	39	25	21	5	67
Other	7	16	7	9	0	7	0	0
<b>Q9: Has the mission for the Center changed in the past two years?</b>								
No, the mission has not changed	71	70	62	70	65	79	75	100
Yes, the mission has changed	29	30	38	30	35	21	25	0
<b>Q10: Will the mission for the Center change in the next two years?</b>								
No	70	61	69	74	60	79	85	33
Yes	30	39	31	26	40	21	15	67
<b>Calculated: percentage of Center directors who report that the Center mission has changed in the past two years that also expect the mission will change again in the next two years.</b>								
	12	16	17	9	25	7	0	--
<b>Q11: Have the organizational reporting arrangements for the Center changed in the past two years?</b>								
No	75	82	72	70	70	76	80	67
Yes	25	18	28	30	30	24	20	33
<b>Q12: Will the organizational reporting arrangements for the Center change in the next two years?</b>								
No	88	89	83	96	90	83	95	100
Yes	12	11	17	4	10	17	5	0
<b>Calculated: percentage of Center directors who indicate that the Center reporting function has changed in the past two years who also expect the reporting function will change again in the next two years.</b>								
	3	0	7	0	5	4	0	--

\* Note: 171 institutions completed the online questionnaire, including just one public baccalaureate college. The data for that one public BA institution are not presented separately in these data tables.

# The 2015 National Survey of Campus Centers for Teaching and Learning

Sponsored by Center for Academic Innovation, University System of Maryland with financial support from the Bill and Melinda Gates Foundation

<i>unless otherwise indicated, all data are for percentages (%)</i>	ALL INSTITUTIONS	Public University	Public MA	Public Two-Year	Private University	Private MA	Private BA	For-Profit
<b>Q13: Annual Center Budget for Academic Year 2014-15</b>								
Average budget	\$ 522,507	\$ 1,116,854	\$ 355,708	\$ 276,605	\$ 1,097,148	\$ 129,194	\$ 71,086	\$ 60,010
Median budget	\$ 137,000	\$ 650,000	\$ 100,000	\$ 65,000	\$ 700,000	\$ 65,000	\$ 35,000	\$ 60,000
<b>Q14: How has the operating budget for the Center changed over the past two years?</b>								
Significant increase: up 8 percent or more	15	8	7	9	30	29	15	0
Modest increase: up 3-7 percent	17	27	17	13	5	7	15	67
Little change: plus or minus 2 percent	51	51	52	48	55	46	60	33
Modest decrease: down 3-7 percent	9	3	14	17	5	11	5	0
Significant decrease: down 8 percent or more	9	11	10	13	5	7	5	0
<b>Q15. Average head-count of key groups of personnel at the Center (number)</b>								
Professional staff who provide services to faculty / students	6.4	10.6	4.1	3.5	9.4	7.2	2.2	2.0
Faculty fellows	2.4	4.2	1.8	2.6	3.7	1.2	0.8	3.0
Administrative support staff	2.3	2.3	1.2	1.7	3.2	4.6	0.8	0.7
Student workers (including graduate students) who support / assist the activities of the professional staff	5.5	9.4	3.3	0.2	12.3	2.0	7.1	0.0
Student workers who support / assist administrative staff	1.2	1.8	0.8	0.5	2.8	1.1	0.7	0.3
<b>Q16. Best estimate of the proportion (%) of the institution's faculty and students who made use of the Center's resources and services during the fall term, 2014?</b>								
Full-time faculty	38	38	38	49	28	38	38	12
<i>not applicable to my center</i>	3	3	10	0	0	0	0	0
Part-time faculty	24	24	31	24	25	17	19	24
<i>not applicable to my center</i>	13	13	10	0	15	10	35	0
Academic staff	15	13	22	18	16	11	11	2
<i>not applicable to my center</i>	33	29	35	26	20	38	45	33
Graduate students	20	22	21	0	24	14	5	3
<i>not applicable to my center</i>	52	5	59	78	30	66	95	67
Undergraduates	18	15	21	9	37	11	26	5
<i>not applicable to my center</i>	63	61	66	65	65	55	65	67
<b>Q17. How would you characterize the current priority of the following initiatives and activities for your Center?</b>								
<i>mean scores (scale: 1=low priority; 7=high priority)</i>								
Course / program development or redesign for on-campus courses	5.4	5.5	5.4	4.9	5.8	5.3	5.4	4.7
Course / program development or redesign for blended / hybrid courses	5.1	5.4	5.2	5.3	5.5	5.4	3.4	6.3
Course / program development or redesign for fully online courses	4.5	4.7	5.2	5.4	4.4	4.3	2.2	6.3
Competency-based learning	3.1	3.6	2.8	3.5	3.1	3.0	2.4	3.7
Adaptive learning technologies	3.4	4.0	3.4	3.9	2.8	3.1	3.4	2.0
Use of third-party digital courseware	3.1	3.1	2.8	3.3	3.2	3.5	2.9	4.3
Digital textbooks and course materials	3.1	3.4	3.1	4.0	2.6	3.0	2.5	4.7
Learner / learning analytics	3.7	4.2	3.6	4.0	3.7	3.6	3.3	3.7
Open Educational Resources (OER)	3.2	3.1	3.4	4.1	3.2	3.0	2.8	2.0
Faculty engagement with students (high impact practices)	6.2	6.3	6.3	6.2	6.3	6.4	6.1	5.7
Digital Badging	2.2	2.6	2.4	2.6	1.9	2.0	1.5	1.7
Assessment of prior learning	3.4	3.3	3.0	3.1	3.3	3.9	4.0	2.0
Use of ePortfolios	3.4	3.3	3.3	3.1	3.4	3.8	3.2	3.7
Gaming and simulations	2.7	3.1	2.5	2.7	2.9	2.7	2.4	2.0
Leveraging Cloud platforms for instruction, (LMS, learning platforms, etc.)	4.6	4.2	4.8	4.8	4.9	5.6	3.5	5.0
Classroom / learning spaces design	4.3	4.6	4.1	4.1	4.9	4.3	3.6	5.0
Improving academic advising	3.2	3.0	2.5	3.1	2.4	3.9	4.2	4.7
<i>percent reporting low priority (score of 1 or 2)</i>								
Course / program development or redesign for on-campus courses	9	5	10	13	0	14	15	0
Course / program development or redesign for blended / hybrid courses	12	5	17	9	5	7	35	0
Course / program development or redesign for fully online courses	25	16	21	4	20	25	75	0
Competency-based learning	50	39	59	35	55	50	68	33
Adaptive learning technologies	38	22	38	22	58	50	42	67
Use of third-party digital courseware	44	44	52	39	47	33	50	33

<b>Q31: Which description below best characterized your college or university?</b> (institutional typology)								
<b>Q32: Would you like to be notified when the survey summary is released? If yes, please provide your email address.</b> (almost all provided email addresses)								
<b>Q33: We would welcome any additional comments about this survey</b> (open ended response)								

## Appendix 05: Institutions Participating in Survey

Albion College	GateWay Community College	Niagara College of Applied Arts and Technologies
American University	George Brown College	North Carolina A&T State University
Anderson University	The George Washington University	North Central State College
Arizona Western College	Georgia Perimeter College	Northeastern Illinois University
Asian University for Women	Georgia Regents University	Northern Illinois University
Austin Community College	Grand View University	Northern Michigan University
Azusa Pacific University	Green Mountain College	Northwestern Michigan College
	Grinnell College	Northwestern University
Bacone College		
Barton College	Heritage University	Oakland University
Bates College	Hiroshima University	The Ohio State University
Bucknell University	Howard University	Otis College of Art and Design
Bucks County Community College		Otterbein University
	Illinois Central College	
Cal Poly State University, San Luis Obispo	Indiana university south bend	Pace University
California Lutheran University	Iowa State University	Pacific Lutheran University
California State Polytechnic University, Pomona	James Madison University	Park University
Cambridge College	Johns Hopkins University	Philadelphia University
Case Western Reserve University	Lake Forest College	Phoenix College
Chapman University		Pine Technical & Community College
Cleveland State University	Lee College	Providence College
Colby College	Lehigh University	
County College of Morris	Lincoln College	Regent University
CUNY- Manhattan Community College		Rhode Island School of Design
CUNY - School of Professional Studies	Marylhurst University	Rhodes College
	McGill University	Rollins College
	Mesa Community College	
	Messiah College	The Sage Colleges
Dartmouth College	Michigan Technological University	Saint Louis University
Davidson College	Middle Tennessee State University	Saint Mary's College of California
Dean College	Minneapolis Community and Technical College	San Juan College
Denison University	Missouri State University	Scottsdale Community College
DePauw University	Molloy College	Seattle University
Des Moines University	Montgomery College	Southern Illinois University Carbondale
Duke University	Montgomery County Community College	Southern Methodist University
	Moraine Valley Community College	Spelman College
EAFIT University	Morehead State University	Spelman College
Eastern Kentucky University	Muhlenberg College	St. Louis College of Pharmacy
Edison Community College		SUNY- Buffalo State College
Edison State Community College		SUNY- College at Brockport
Elon University	New York Institute of Technology	SUNY - Purchase College

Stevenson University	University of Georgia	The University of Texas at Brownsville
Stonehill College	University of Hawaii	University of Trinidad & Tobago
Suffolk University	University of the Incarnate Word	University of Utah
	University of Maryland, Baltimore County (UMBC)	University of Washington
Temple University	University of Massachusetts, Amherst	University of West Florida
Tennessee State University	University of Michigan	University of West Georgia
Texas A&M University - Central Texas	University of Nebraska at Omaha	University of Wisconsin, Eau Claire
Texas Tech University	University of New Mexico	University of Wisconsin System
Thomas Jefferson University	University of North Carolina, Asheville	Utah Valley University
Trinity University	University of North Florida	Valdosta State University
Tufts University	University of North Texas	Valencia College
	University of Notre Dame	Vanderbilt University
University of Alaska Anchorage	University of Pittsburgh	Washington University in St. Louis
University of Arkansas	University of Pretoria (South Africa)	Weber State University
University of California, Irvine	University of Puget Sound	Western Carolina University
University of California, Riverside	University of Rhode Island	Western Washington University
University of Central Arkansas	University of San Diego	Winona State University
University of Central Florida	University of the South	
University of Cincinnati	University of South Dakota	Yale School of Management
University of Colorado, Boulder	University of South Florida	Yale University
University of Connecticut		
University of Dayton
